

TROPHIC LEVEL INTERACTIONS DATA TABLE

Choose 4-5 organisms from the Species Cards to conduct further research on before constructing food chains and food webs. Use the blank Species Cards to create additional cards for organisms you discover through your research. For example, if you learn that white-tailed deer use the American beautyberry as an energy source, draw it on one of the blank cards to use for your food chain or web. You can start here: myfwc.com/wildlifehabitats/profiles/.

Energy Sources (list 1-2)	Trophic Level (primary producer, primary consumer, secondary consumer, tertiary consumer, decomposer, scavenger)	Type of Consumer (herbivore, omnivore, carnivore, or detritivore)	Name of Organism			
1. American beautyberry 2.	Primary producer	Herbivore	white-tailed deer
