DEVELOP AN ARGUMENT BASED ON EVIDENCE

With your group, study the map of the Florida Wildlife Corridor, using information in the map key. Building on what you've learned throughout this exercise, discuss and answer the questions below.

1. Identify panther habitat versus developed areas. How does this relate to your county?

2. Describe the information the map provides about the intersection of human development and panther habitat.

3. Suggest how ranchland might provide key habitat/corridors for wildlife.

4. How might wildlife corridors benefit both panthers and humans in Florida?
